

| AGRICULTURE | | | |
|----------------------------------|------------|-------------|---|
| Equipment Description | Incentive | Per Unit | Equipment & Eligibility Requirements |
| Efficient Dairy Equipment | | | |
| Automatic Milker Takeoffs | \$90.00 | Takoff unit | Purchase and installation of more efficient electric driven equipment in retrofit application. "Purchase and installation of a new automatic milker takeoffs to replace pre-existing manual takeoffs on dairy milking vacuum pump systems." " |
| Dairy Scroll Compressors | \$1,000.00 | Unit | Purchase and installation of more efficient electric driven equipment in retrofit application. "Purchase and installation of a new scroll compressor to replace an existing reciprocating compressor or to be installed in a new construction application." " |
| Livestock Waterer | \$80.00 | Unit | Purchase and installation of more efficient electric driven equipment in retrofit application. "Purchase and installation of an energy efficient livestock waterer that is thermostatically controlled and has minimum of two inches of factory-installed insulation." " |
| VFD On Dairy Vacuum Pumps | \$1,000.00 | Unit | Purchase and installation of more efficient electric driven equipment in retrofit application. "Purchase and installation of VFD and controls on dairy vacuum pump or purchase of a dairy vacuum pump with variable speed capability. Pre-existing pumps with VSD's are not eligible for this measure." " |
| High Efficiency Ventilation Fans | | | |
| High Efficiency Ventilation Fan | \$ 215.00 | Unit | Purchase and installation of a new high efficiency ventilation fans in retrofit applications. |
| High Volume Low Speed Fan | \$ 125.00 | Unit | Purchase and installation of a new high efficiency ventilation fans in retrofit applications. "Purchase and installation of High Volume Low Speed (HVLS) fans to replace conventional with a minimum of 16 feet long in diameter and move more cubic feet of air per watt than conventional circulating fans." " |
