

COMPRESSED AIR KEEPS FACILITY COSTS LOW

Don't underestimate the impact of your facility's electric air compressor—it can account for as much as 30 percent of your facility's energy costs if inefficient. Potomac Edison is here to help take the burden off your old compressor with our Energy Solutions for Business Program, which offers custom solutions based on your company's needs. Discover areas where your facility is wasting significant energy and receive suggestions on equipment upgrades and replacement options to reduce your overall energy costs.

BENEFITS

Energy-efficient compressors are quieter and more stable, resulting in increased reliability and reduced maintenance costs. Potomac Edison offers custom project incentives up to 50 percent of the total project cost for retrofit projects, and up to 75 percent of the incremental cost for new construction or major renovation projects with an overall incentive cap of 22¢ per kilowatt-hour saved. Incentives are capped at \$1 million per project, per customer, per year.

IS IT TIME TO UPGRADE?

- Is your compressor keeping up with your leaks?
- Does your plant pressure drop with no significant changes in production?
- Do you have a sequencing and controls system installed?
- Are you planning an expansion or compressed air upgrade?

HOW TO GET STARTED:

NEED A LITTLE HELP GETTING STARTED? CALL **855-801-5803** AND A TECHNICAL EXPERT WILL ASSESS YOUR FACILITY, PROVIDING ENERGY-EFFICIENT RECOMMENDATIONS.

1. Register and apply online at **energysaveMD-business.com**.
2. Pre-approval is required prior to purchase and install of the equipment.
3. Install the approved equipment and submit final application with documents.
4. Complete a post-inspection from our program team to verify savings.
5. Receive your incentive within approximately 90 days of your completed submission.
