

# SAVE BIG WITH MORE EFFICIENT ELECTRONICS.

Upgrading to energy-efficient consumer electronics is a simple and effective way to reduce energy usage and save money. In particular, new computers and monitors that shut off when not in use represent a great opportunity for savings — as much as 75% savings for some products. Overall, ENERGY STAR® certified office products use about half the electricity of standard equipment!

Potomac Edison’s Energy Solutions for Business Program offers incentives per unit installed to help offset the cost of a project from our predetermined lists of options.

## EQUIPMENT AVAILABLE

ENERGY STAR certified monitors, computers	\$4.25 each
Imaging	\$8.50 each
Small network software (network power management enabler)	\$12.75 per PC
Uninterruptible Power Supply (UPS)	\$350 per unit

## SAVINGS EXAMPLE

Project	Estimated kWh Savings	Potomac Edison Incentive
150 new ENERGY STAR V7.0 computer monitors	2,250	\$637.50

## HOW TO GET STARTED

CALL 855-801-5803 AND A TECHNICAL EXPERT WILL ASSESS YOUR FACILITY, PROVIDING ENERGY-EFFICIENT RECOMMENDATIONS.

1. Register and apply online at **energysaveMD-business.com**.
2. Pre-approval is required prior to purchase and installation of the equipment.
3. Install approved equipment and submit final application with documents.
4. Complete the post-inspection from our program team to verify savings.
5. Receive your incentive within approximately 90 days of your completed submission.
